Degree: Bachelor of Science
Specializations: Bioinformation,
Computer Technology,
Digital Enterprise, Digital Media,
e-Learning Support Systems
Coordinator: Dr. K.K. Fouché
Building 11, Room 221
(850) 474-2688
iit@uwf.edu

Semester Hours Required for Degree: 120

The Interdisciplinary Information Technology (IIT) degree is a cooperative effort among all three colleges at UWF. Students complete a set of prerequisites, a common core, and courses from one of five IIT specializations: Bioinformation, Computer Technology, Digital Enterprise, Digital Media, or e-Learning. Each track includes a Minor or a Certificate and a senior capstone experience.

PROGRAM REQUIREMENTS

In addition to general University requirements, students seeking the B.S. in Interdisciplinary Information Technology must meet the requirements listed below.

Students should consult with their academic advisor for courses which may satisfy both the General Studies requirements and common prerequisites.

Course descriptions are listed alphabetically by prefix in the back of this catalog.

BIOINFORMATION SPECIALIZATION

The Bioinformation Specialization is a collaborative effort between the Departments of Biology and Computer Science. The purpose of this specialization is to provide students with sufficient training in both fields to allow them to enter the rapidly growing market for personnel capable of storing, extracting, organizing, analyzing, interpreting, and utilizing the increasing mass of biological data. The skills provided to students within this specialization will address the major challenge of utilizing the immense storehouse of biological and medical data to solve problems and develop new products for the biomedical, pharmaceutical, and biotechnology industries. For further information about this specialization, contact the Department of Biology at (850) 474-2748 or biology@uwf.edu.

General Studies (36 sh)

+ BOT 2010/L	General Botany/Lab 4
+ ZOO 1010/L	General Zoology/Lab 4

+ Indicates common prerequisites which can be used to satisfy General Studies requirements.

Lower Division Electives (0-6 sh)

Sufficient 1000/2000 level electives to complete at least 60 semester hours in the lower division. Current UWF students may use elective courses at any level (1000-4999) to meet this elective requirement.

Major (51-52 sh)

Major Courses are generally those offered by the major department. They may consist of specified courses, choices from a list of courses, or choices from specified course prefixes.

Interdisciplinary Information Technology Common Core (15-16 sh)

CGS 3283	Networking Principles* 3
CGS 3604	Applications of Information Technology 3
COP 4710	Database Systems 3
GEB 3032	Business Foundations for Non-Business Majors 3

* e-Learning Systems Support Specialization students should take EME 4622 (4 sh) instead of CGS 3283

Upper Division Electives (4-5 sh)

Sufficient 3000/4000 level electives to meet UWF's requirement of 48 semester hours in the upper division or completion of all departmental requirements at the 3000/4000 level, whichever is greater.

**COMPUTER TECHNOLOGY
SPECIALIZATION**

The Computer Technology Specialization provides a firm foundation of basic coursework in programming principles, database concepts, and general topics in computer science. Graduates of this program will have a strong foundation in computer skills required for most entry-level positions in database administration, software development, and systems analysis. For further information about this specialization, contact the Department of Computer Science at (850) 474-2542 or csadvisor@cs.uwf.edu.

DIGITAL ENTERPRISE SPECIALIZATION

The Digital Enterprise specialization provides applied study of Internet programming concepts, networking principles, website graphics and design development, and digital commerce technology. This curriculum features practical, hands-on experience with cutting-edge Internet computer applications. Successful graduates of the program will be prepared for high tech positions such as Internet programmer, webmaster, and Internet commerce technology analyst. Capstone experience is the Digital Enterprise Senior Project; Degree includes a minor in e-Business. For further information concerning this specialization, contact the Department of Marketing and Economics at (850) 474-2652 or digital@uwf.edu.

No more than 30 semester hours of College of Business prefix courses may be applied to this degree.

DIGITAL MEDIA SPECIALIZATION

The Digital Media Specialization presents students with a program of study that emphasizes the creativity of studio arts practices in exploring, shaping, and influencing information technology. A blend of creative problem solving, studio practice, business, and technology creates a program for today and the future. This program extends the activities of the visual arts digital media program at UWF, a state of the art facility dedicated to creative problem solving, artistic communication, and development in design, interarts, computer/digital imaging, web design, digital media installation, and performance. Students will take a series of courses designed to give them hands-on experience with a full range of arts theory and practice. Study in the IIT Digital Media Specialization will provide students with both the theoretical foundation and practical experience needed for careers in fields related to IIT digital media. For further information about this specialization, contact the Department of Art at (850) 474-2045 or visualarts@uwf.edu.

e-LEARNING SUPPORT SPECIALIZATION

The e-Learning Systems Support Specialization is an intensive professional development program for higher order skills in the design, implementation, and maintenance of network and telecommunications systems for training and education organizations. It provides an alternative path to the short term, time-sensitive, narrowly focused, application-specific skills training provided by commercial training concerns or community colleges in the form of a lengthier, more generalized, broad-ranging course of study. The program is highly technical without being too narrowly focused, and provides additional emphasis on developing strategies for the application of the technologies in innovative ways. Special attention is also devoted to development of planning and organizational skills required to implement and evolve complex systems as well as maintain them. For further information contact the Department of Technology, Research, and Development at (850) 474-2300 or at trd@uwf.edu.
