Through the study of Psychology, students learn to evaluate and understand behavior and experience. This knowledge is personally valuable and provides a base for a variety of professions in education, research, business, and clinical settings.

The undergraduate program gives an overview of the discipline and a foundation for graduate study. Within the program, students have many opportunities to pursue those aspects of psychology they find most interesting.

## PROGRAM REQUIREMENTS

In addition to general University requirements, students seeking the B.A. in Psychology must meet the requirements listed below.

Students should consult with their academic advisor for courses which may satisfy both the General Studies requirements and common prerequisites.

Contact the department for information concerning the certificate program.
