Students interested in economics as it applies to business and government organizations may earn the Bachelor of Science in Business Administration (B.S.B.A.) degree with a major in Economics. The program provides students with a comprehensive view of the area of economics in business, allowing them to apply a set of analytical tools to understand the interrelations between the economy and the business environment under different market conditions.

Economics majors develop technical and analytical skills needed for policy oriented decisions in local and global markets, often based on analysis of fundamental resource allocations issues. Economists work in a broad range of areas including business strategy (should we expand into a new market?), societal policies (what is the best way to fight environmental pollution?), and global issues (what rules should govern trade among nations? or how is trade affected by elimination of tariffs and quotas?). Students in the B.S.B.A. in economics program actively participate in small projects, such as data analysis and forecasting, intended to provide them with hands-on experience in managerial decision making. Specific topics include healthcare, crime, finance, production, international trade, labor, taxation, politics, the environment, pricing strategies, regulation and deregulation, data analysis and forecasting, and many others.

Many Economics graduates choose to attend graduate school, thereby enhancing their career opportunities. A major in Economics provides outstanding preparation for the M.B.A. degree and an Economics degree is regarded as an excellent background to study Law or to pursue a Master in Economics degree.

Economics program students at UWF choose one of three specializations.

Comprehensive Economics Specialization

This specialization prepares students for a broad range of career positions in economics. Students have a great deal of flexibility in structuring their program, subject to advisor approval.

Economic Research Specialization

This specialization focuses on applied research and analytical economic issues. An important component of this specialization is the required internship at the UWF Haas Center for Business Research and Economic development.

Global Economics Specialization

This specialization focuses on economic issues in an increasingly global market. Students are required to spend at least one semester at one of UWF's partner universities abroad studying economics. This cultural as well as educational experience

prepares students especially well for positions in international economics and business. Students must complete a specific sequence of courses in this specialization, designed in conjunction with their advisor, at a partner university abroad. To participate in this required part of the program, students must have a minimum 2.50 cumulative GPA. It is recommended, but not required, that during their lower division studies students complete two additional courses in a foreign language beyond the University's foreign language admission requirement.

PROGRAM REQUIREMENTS

In addition to general University requirements, students seeking the B.S.B.A. in Economics must meet the requirements listed below. A minimum course grade of "C" is required in all College of Business prerequisites, major, and Major-Related courses.

Students should consult with their academic advisor for courses which may satisfy both the General Studies requirements and common prerequisites.

Course descriptions are listed alphabetically by prefix in the back of this *Catalog*.

General Studies (36 sh)

Economics majors should take SPC 2016 to satisfy the humanities/values and expressions component, STA 2023 and MAC 2233 to satisfy the mathematics component, and ECO 2013 to satisfy the social science/socio-political component of General Studies. For additional information see the General Studies section of this *Catalog*.

Common Prerequisites (21 sh)

State mandated common prerequisites must be completed prior to graduation, but are not required for admission to the program. Courses in brackets indicate substitutes from Florida public community/junior colleges and universities.
