The Engineering Technology program prepares graduates for a variety of engineering associated positions with industry.

The Construction specialization examines construction of all types and prepares the student for career roles such as project manager, construction superintendent, and estimator. The program teaches methodologies for managing cost control and processes through courses in contracting, scheduling, and business management. A combination of all coursework applies to any graduate who desires to sit for the residential or general contractor's exam.

The Electrical specialization provides a strong background in electrical and electronics related fields preparing graduates to apply mathematical and scientific concepts to solving real-world problems. Individuals develop skills such as analog and digital electronics design, development and analysis of industrial electricity and power systems, electric circuit theory, and design and operation of microcontrollers and communication systems. Employment opportunities exist in instrumentation, communications, digital systems, power systems, manufacturing, and other related fields. The graduates may also be involved in research, development, maintenance, production or sales in the area of electrical engineering.

The Information Engineering Technology Specialization prepares individuals to assume roles in network, telecommunications, and instructional systems support in a wide variety of organizations, including those with main missions in training, education, and distance learning. These roles include design, development, implementation, maintenance, and adaptation of technologies to meet the organizational goals. The program is designed for delivery at a distance and exploits technology to offer learners opportunity to pursue the degree even when regular attendance is problematic or relocation is necessary.

PROGRAM REQUIREMENTS

In addition to general University requirements, students seeking the B.S. in Engineering Technology must meet the requirements listed below.
